

Recruiting for Nursery and Early Years Centres

Ruskin Education's recruitment services have built a strong profile with early years practitioners in the UAE with many prospective candidates for posts in nurseries registering on the company's database of potential staff.

During the last two years, Ruskin's recruitment team have secured several Contracts to recruit staff for nurseries in the UAE including nursery managers, teachers, teaching assistants, admin and registered nurses. We have served nurseries offering EYFS, Montessori and tailored curricula and successfully recruited staff at all levels.

Our Early Years recruitment team works with owners and nursery managers to create job descriptions, advertise, search and qualify appropriate staff for Appointment. Our process includes, initial screening, interviews, all reference and child protection checks and through to initial shortlisting and supporting the client in finalizing the selection of staff.

Our network and advertising profile extends well beyond the Gulf region and includes access to nursery teacher networks in the UK, South Africa and as far as the USA, and includes specialist tri and bi-lingual teachers, early years physical activity specialists, and experienced paediatric nurses.

From a relatively late start, Ruskin accepted the challenge in 2015 to secure a full team of staff for a new and dynamic nursery in Dubai with a niche curriculum and enrichment programme which included immersion in several languages. Within a tight timeframe, we screened and interviewed over 100 potential members of staff to secure the best team for the nursery start up. All was completed to schedule and staff on-boarded and inducted with the client in ample time for the opening of the nursery.
